- Lead the development of industry qualification, set and quality assure industry standards, and endorse vocational education programmes prior to NZQA approval.

TAG Terms of Reference

Pūtake Purpose	Hōkai Scope	Mematanga Membership	Hui Meetings	Aramahi Methodology
Ensure that significant decisions made on behalf of industry have due exposure to all the representatives. This is to ensure a balanced approach to decision-making is central to the working of the review committee.	The scope of this committee relates to the new development of a CNC product around qualification development, unit standards/skill standards or micro-credentials.	Membership of the CNC product development committee is made up of industry and provider members and subject matter experts and other technical experts.	Meetings will be recorded to assist with minute taking. The Technical Working Team (nominated at this meeting) will minute meetings as required. The meeting dates can be set at this meeting.	Keep it simple and quick. Standardised paper/email format will be used and taken as read before the meeting.

TAG Functions:

- Consolidate the info from today with the Hanga-Aro-Rau tīma
- Determine an overall outcome for CNC
- Notify Technical Advisory Group members of meeting dates
- Start developing products with the assistance of the Technical Advisory Group.
